

I fully support the ARRL Petition For Reforming / Restructuring the Amateur Radio Licensing System. I am interested in amateur radio but, given a family and hectic work schedule, do not have the time to attend classes to learn Morse code and the extremely technical theory in the Technician & General Class programs.

I am definitely interested in obtaining a new Novice class / Communicator class license if the system is restructured. In fact, I'll probably go for a General Class license once the Morse code barrier is removed. Please support the ARRL petition for the good of ham radio and this nation.
